## WARNING

**DO NOT USE IF SEAL ON CAP IS BROKEN OR MISSING.**

Thank you for purchasing Kennel Koff. We appreciate your business and hope to add you as a valued customer.

### Storage

Keep out of the reach of children. Do not store above 95 degrees F (refrigerate) or below 46 degrees F. Kennel Koff has a four year shelf life.

Caution: Do not mix Kennel Koff with Vibactra™, UTR™, Vibactra Plus™, HWF™ Kocci Free™. DO NOT USE WITH BAYTRIL OR TAMIFLU. As with any food product, herbs can antagonize allergies in your pet. **Stop giving Kennel Koff if you see any of the following:** Rashes, hives, edema (swelling), diarrhea, or blood in stools. If your pet has a reaction give charcoal and take it to a veterinarian. (Have your vet treat for symptoms. Kennel Koff will be out of your pets system in 3 hours). May cause miscarriage in some animals.

### Suggested Use

Read the product use and dosing carefully before beginning the Kennel Koff. Shake bottle well before each use. Do not leave the cap off for long periods allowing the alcohol to evaporate.

### Dosing

Each bottle of Kennel Koff comes with a dropper. If dosing multiple animals you may want to get a dropper for each one to prevent the spread of disease. Infant animals can be dosed by giving the product to the mother. When doing it this way you must be sure the infant is nursing adequately.

To give a dose of Kennel Koff put the recommended dosage under the tongue (best way) but even if you can only get it into the mouth it will be enough. For birds and small animals you must dilute the alcohol out of Kennel Koff before administering to your pet. Do this by adding Kennel Koff to a teaspoon of water (warm if possible) or in the case of birds by adding it to their water supply. **DO NOT EXCEED DOSING RECOMMENDATIONS.**

### Kennel Koff Dosage Chart

Note: there are approximately 29.57 ml in one fluid oz. This chart supersedes the box.

Weight	Drops	ml/cc	Times daily
Under 3 lbs	2	0.06	4
